

## **UPCOMING PLANNED KEY EVENTS**

### **Tank Waste Remediation System:**

- Implement declaration of readiness for Office of River Protection Phase II Verification of the TWRS Integrated Safety Management System, April 1999
- Initiate sluicing campaign #2, April 1999
- Update TWRS Operations and Utilization Plan, May 1999
- Complete Alternative Generation Analysis for SST Retrieval of tank 241-C-104 and issue Phase 1 Tank Source Selection , May 1999
- Submit required infrastructure support systems information for privatization, May 1999

### **Groundwater/Vadose Zone (GW/VZ) Integration**

- Issue preliminary characterization plan for S/SX tank farm waste management, April 1999
- Issue GW/VZ Project Management Plan (BHI, FDH, PNNL), April 1999
- Complete draft mission analysis and top level GW/VZ project logic, May 1999

### **Waste Management:**

- Campaign 99-1 for the 242A Evaporator, June 1999

### **Spent Nuclear Fuels:**

- Complete 327 Building fuel removal, May 1999
- Submit 100K Basins Safety Analysis Report revision to RL, May 1999
- Complete Canister Storage Building production tubes installation, May 1999
- Submit Cold Vacuum Drying Final Safety Analysis Report to RL, May 1999

### **Facility Stabilization:**

- Complete venting of Tank 241-Z-361, April 1999
- Complete PFP Integrated Project Management Plan , April 1999
- Complete vapor sampling of Tank 241-Z-361, May 1999
- Complete B Plant punchlist and turnover package, June 1999

### **Environmental Restoration:**

- Transition PUREX facility to ER Project, April 1999
- Restart 200-ZP-2 Vapor Extraction System, April 1999
- Finalize GW/VZ Baseline, Long Range Plan and Project Specification documents, June 1999
- Transition B Plant to ER Project, July 1999
- Excavate contaminated soil at 100 B/C, 100 D Area, 100 H Area, and 300 Areas, Ongoing
